

AKE® Bluetooth® EXTENSION SET (Bluetooth to helmet) for HARLEY® E-Glide

Kompatible to 1998-2011 Harley 7-pin audio systems

Local law may prohibit the use of headphones by the driver of a motorized vehicle. Always follow applicable laws and regulations. The Bluetooth Extension Set allows via headset in the helmet wireless communication with the passenger, hearing GPS-voice and music from motorbike internal audio system. Scope of delivery: AKE Bluetooth Helmet Connector type Harley, AKE Stealth Bluetooth Helmet Set

The Bluetooth Helmet Connector type Harley comes with 12V power connection, so don't need charging the Bluetooth Helmet Connector. Connect the according marked wire with board power. Then connect the AKE Bluetooth Helmconnector with one of the helmet plugs.

For optimum operating the different electronic devices have to synchronized as follow:

Speech intelligibility in driver helmet with optimum setting: > 160 km/h - good. Specially in pillion helmet is a lower intelligibility possible with loud helmet type and high speed.

With the delay from the Bluetooth transmission the voice sound reverberates a little bit but has no influence on the speech intelligibility.

Bluetooth helmet connector for 1998-2011 Harley 7-pin audio systems

When driving solo, you can also use the back side plug for driver
